Halloween Activities in Our Community

Java Edge—October 31st @ 7 pm

Quote of the month: I think it's fair to say that personal computers have become the most empowering tool we've ever created. They're tools of communication, they're tools of creativity, and they can be shaped by their user.

Student of the Month

Mariah McGriff started with VDLP back in May of 2009. She said she "wanted to work ahead for early graduation and be able to travel with her grandfather's racing team". When her art teacher at Corona Foothills Middle School told her about her daughter taking classes with VDLP, she decided to give us a try. The VDLP is working out great for her. She is not only working ahead of her current grade level toward her goal of graduation, but she is able to travel with the family racing team. After graduation, she wants to "go to college for a career in Business Management".

Mariah's mom, Shelly, is also very happy with her progress in the VDLP. As a parent, she thinks it is great because it "has provided Mariah with opportunities that she wouldn't have been able to encounter". When she isn't busy learning online with VDLP, Mariah likes to work on cars in the shop, listen to country music, and participate on the Vail High School Robotics team.

Congratulations Mariah!

Important Reminders!!**Seniors****Senior Exit Project**
